LOYOLA COLLEGE.

Loyola College, conducted by Fathers of the Society of Jesus, was founded in September, 1852; and in April, 1853, was endowed by the Maryland Legislature with full collegiate powers and privileges.¹

The College Course, which leads to the Degree of Bachelor of Arts, consists of four classes, corresponding to the Freshman, Sophomore, Junior, and Senior years, but known in the Colleges of the Society as First Grammar, Poetry, Rhetoric, and Philosophy. It embraces the study of the Doctrines and Evidences of Religion; Logic, Metaphysics, Theodicy, and Ethics; the English, German, French, Latin and Greek languages; Rhetoric, Poetry, and Elocution; Mathematics and the Natural Sciences; History, Geography, and Mythology.

Grammar Department. Besides the four regular College classes, there is a complete Grammar Course, where the student lays the necessary foundation for the higher work of the College classes.

Special advantages for physical development are afforded in a well-equipped gymnasium.

¹The legal title for bequests, "The Associated Professors of Loyola College in the City of Baltimore."

A Special Class in Latin and Greek is formed each year for those beginners in these languages whose knowledge of English and Mathematics is above the grade of the lowest class in regular course.

Business Training. Application is often made for a special training which will fit the student immediately for business. Experience, however, proves that but a very poor substitute for education can be found in the almost exclusive development of a single faculty. The most successful business man is not he who has learned merely to read, write and cipher; but the one who, with true farsightedness, having first had all his powers developed by a liberal education, is enabled afterwards to bring a tenfold mental activity to mercantile pursuits. The details of business life can be learned only by practice; and these once mastered, superior training makes itself felt from the very outset. Instead, therefore, of adopting a special commercial drill, the College aims to secure the most thorough instruction in all branches of mathematics, together with solid classical training.

Study of English. One of the principal objects ever kept in view in reading the Latin and Greek classics, is to make use of them as an invaluable aid to the study of English. The student having once shown by an exact literal translation that he fully understands the author, is required to express in pure, idiomatic, and elegant English, the very shade of meaning conveyed by the text. This kind of translation is given not only in writing, but also orally, in order that fluency of language may be acquired along with propriety of expression. Finally, the student's version is compared with English translations of acknowledged excellence, and points of resemblance or difference carefully noted. The plays of Shakespeare, the works of other poets, American and British, and the masterpieces of American and British orators and prose writers, are made the subject of critical study and analysis. Moreover, an English essay, narration, description,

or other composition, in prose or verse, is written by every student once a week.

Mathematics. One hour a day is devoted to Mathematics. In the Arithmetic and Algebra classes, the special matter of the previous year is always repeated before the student is allowed to advance. The classes in the mathematical course are arranged so as to correspond, as nearly as can be, with those of the classical course. In this way both courses end together in Rhetoric, and proficiency in both is requisite before entering Philosophy.

Course of Science. The physical sciences are taught both to furnish interesting information, and to aid in the complete training of the mind, by giving an insight into the formation, the elements and the forces of the visible world about us. The sciences are, accordingly, kept for the last three years, when the student is able to bring to the study of them a more mature judgment and, in the last year, a less divided attention. Chemistry is begun in the class of Poetry, and the student, before entering Philosophy, must pass a successful examination in elementary Chemistry. The Laboratory, in which each student has his own table, furnished with all necessary apparatus and chemicals, affords every facility for chemical analysis. The Philosophers are present daily at lectures on Physics, embracing Hydrostatics, Pneumatics, Sound, Heat, Light and Electricity. Lectures on Mechanics, Astronomy and Geology also are given. To supply the experimental training essential in these branches, there is a collection of chemicals and physical apparatus, as also of specimens illustrating the study of Geology and Mineralogy.

Libraries and Reading Room. The College Library contains nearly 40,000 volumes, of which 2,000 have been carefully selected for the immediate use of the students, who have, besides, their society libraries and reading rooms, where they may resort before and after class and during vacation, and where they may learn to find information on useful sub-

jects, to develop a taste for serious reading, and to cultivate a real friendship for books.

Religious Training. The college authorities are convinced that without religion there can be no education, in the true sense of the word; that is to say, no complete and harmonious development of the intellect and heart of man. They hold, furthermore, that religious truth, being definite and certain like any other truth, is as susceptible of teaching as the science of language or the theory of numbers. Hence, the Catechism of Christian Doctrine is a text-book in every class, and lectures on it are given twice a week; and in all the classes the day's work begins and ends with prayer. The Catholic religion is taught to Catholic students, who are required to attend regularly to their religious duties; non-Catholic students are freely admitted and their religious views respected.

Monthly Marks. On the first Monday of every month the marks of all the students, except the Philosophers, are read out publicly before the Faculty. The class standing or monthly mark for each student is the average result of daily lessons and exercises, and weekly review papers in all the branches. 100 being the maximum, a student who receives 95 marks merits a testimonial. A monthly report of class-standing, conduct, and studies, is sent to parents, who will sign and return it with information as to conduct and application at home.

Examinations. There are two examinations each year—the one in January, the other in June. These examinations are both written and oral. The annual promotions and prizes are decided by the examinations combined with the monthly marks of the entire year. Promotion during the year must be warranted by unusual success. A student who proves himself unfit for his class—especially at the January examination—will at once be placed in a lower grade. In the graduating class the special prizes are decided by oral

specimens, written essays on philosophical subjects, combined with the June examination.

Scholarships. Some generous patrons of the college, by contributing a thousand dollars each, have founded several public scholarships, whose incumbents are decided by a competitive examination. The scholarships founded up to date are known as the Cardinal, Rhetoric, Johnson, Andrews, Lanahan, Loyola, and Maryland Scholarships. Besides these public scholarships there is the Parochial Scholarship for the medal boy in each parish—provided he passes a satisfactory examination—and the Pastoral Scholarship, which entitles each Pastor of the city to send one promising student. Furthermore, the Faculty is empowered to assist such boys as pass a noteworthy examination, and yet fail to secure a public scholarship. The competitive examination for the vacant scholarships occurs every year about August 25.

Degrees. The degree of Bachelor of Arts is conferred upon students who have made the regular course, and have passed satisfactory examinations in the English branches of study, the Latin and Greek classics, French or German, Mathematics, Chemistry, Physics, Mechanics, Mental and Moral Philosophy.

The degree of Master of Arts, in course, is conferred upon Bachelors of Arts who have passed a satisfactory examination either in the post-graduate course or in other courses of liberal studies. Honorary degrees are conferred, at the discretion of the Faculty, upon those who unite proficiency in the classics with eminence in literature or science.

Prizes. Besides the class prizes, special valuable prizes, known as the Knott, MacTavish, Whelan, Ryan, Jenkins, Whiteford, Lee, and Murphy medals, are given annually.

Regulations. Along with moral and mental training, the college lays great stress on the development, in all its students, of the manners of perfect gentlemen, and looks upon the rules of politeness as a very important part of its course

of study. Whatever, therefore, is contrary to good breeding, or would be out of place in good society, is equally out of place in the college. The college considers itself bound by the strictest contract to procure, as far as possible, the advancement of all its students ; but only on one condition, that the parents or guardians fulfil their part of the contract by complying with the college regulations. Despite all the professor's painstaking, it is impossible to insure success without close and constant application on the part of the students themselves, outside of class hours. Parents and guardians, accordingly, are informed that *home study* for the space of *three hours* is required *every day*. Home study being secured, the next requisites for success are regular attendance and punctuality. Absence, even for a short time, lowers class standing so rapidly, that the college prefers a student to withdraw altogether rather than not attend regularly. It requires, therefore, *attendance from the first day, attendance every day, and attendance the whole day*. Classes begin precisely at 9 a. m. and close at 2.30 p. m. ; a short recess occurs at 10.45 a. m., and a long one at 12.40 p. m.

Weekly Holiday. Thursday has been chosen in preference to Saturday, as affording a more natural break in the routine of study, and enabling the minds of the students to be fresher for their books at the end of the week.

Terms. The tuition for every department, payable quarterly in advance, is \$12.50. Students in Chemistry and Natural Philosophy pay \$10.00 per annum for use of materials and apparatus. Diploma for any degree, \$10.00.

Admission. In the case of every candidate for admission who is not personally known to some member of the Faculty, a satisfactory certificate must be furnished. Boys are admitted to the Class of Rudiments who have reached the age of twelve years, and are so far developed in mind, and so well acquainted with the elements of English, as to enable them to begin with profit the study of Latin. Arithmetic must be known, at least to the end of Fractions.

THE CLASSICAL COURSE.

Collegiate Instruction at Loyola is based on the idea that a complete liberal education should aim at developing all the powers of the mind, and should cultivate no one faculty to an exaggerated degree at the expense of the others. During the early part of the course, the student's attention is principally devoted to acquiring an accurate knowledge of his native tongue and of elementary mathematics, with all the branches ordinarily taught to boys from twelve to fifteen years of age. At the same time the rudiments of the Latin tongue are mastered, and the study of grammar is thus made from the beginning comparative and analytical. By means of constant oral and written exercises, the study is rendered thoroughly practical. In the second year Greek is begun, followed in the third, by French or German. As the pupil advances, his judgment is exercised more and more, while less attention is given to mere memory work. When, after three years of preparation, he reaches the College course, properly so called, he is supposed to be able to read with some facility Latin, Greek, and either French or German. In the first year of the College course he perfects his knowledge of the grammar of these languages, especially Latin and Greek, that he may have the tools of literary work under his control. He then devotes himself more particularly to the cultivation of his literary tastes and powers, by reading and imitating the best models of ancient and modern literature. The year of Poetry is given to the *training of the imagination*. The nature of poetry is explained, the technicalities of verse-making are

mastered and practised, and the great poets are carefully studied. Then comes the year of Rhetoric; during which the student's *critical powers are exercised and developed*, poets and prose writers are scientifically analyzed, the principles of oratory are carefully examined, and the speeches of the world's greatest orators are read and discussed. While this literary training has been going on, the course of mathematics has been steadily continued, and natural science, in its various branches, has been taken up, as soon as the development of the mind admitted of its being pursued in a systematic and scientific way. The last year of the course serves, especially, to *discipline the reasoning faculties* by the study of Logic, Metaphysics, and Ethics, and by higher studies in the natural sciences. During this year great attention is given to Metaphysics, a thorough knowledge of which is regarded as of the utmost importance, since it serves to arrange systematically all the student's knowledge and furnish the key to all true science. Whatever is important in natural science is taken into the course, and taught with a philosophical analysis intended to guard the student against that confounding of mere information with learning, which is the threatening danger in modern education. This is a bird's-eye view of the world-famed classical course—a course much misunderstood, but whose success in developing and training all the powers of the mind, and rendering it capable to understand and appreciate all branches of learning, centuries of practical experience make manifest. This course, which serves as a foundation for special training in any branch which the student, with his mind matured and trained, may decide to take up, is obligatory on all; to render it in any considerable degree elective, would be to defeat its very end and aim.

COLLEGE COURSE OF STUDIES

FOR THE

DEGREE OF BACHELOR OF ARTS.

FIRST GRAMMAR.

LATIN.—*First Term.*—Sallust—Virgil's Eclogues and Georgics—Yenni's Latin Grammar, Introduction to Latin Composition, and Prosody.

Second Term.—Virgil's *Æneid*—Cicero's Minor Works—Exercises in Metrical Composition.

GREEK.—Xenophon's *Cyropaedia*—Homer—Yenni's Greek Grammar.

ENGLISH.—Ancient History—Mitchell's Classical Atlas and Geography—Brooke's English Literature—De Harbe's Larger Catechism—Composition—Declamation—Reading.

MATHEMATICS.—Loomis' Geometry.

MODERN LANGUAGES.—Elective.

POETRY.

LATIN.—*First Term.*—Virgil's *Æneid*—Livy—Horace's *Ars Poetica*—Yenni's Prosody.

Second Term.—Cicero's Orations—Horace's Odes—Composition in Prose and Verse.

GREEK.—*First Term.*—*Iliad*—The Olynthiacs of Demosthenes—Yenni's Grammar.

Second Term.—*Iliad*—The Philippics of Demosthenes.

ENGLISH.—Burke's *Lingard*—Gummere's Handbook of Poetics—Brooke's English Literature—De Harbe's Larger Catechism—Composition—Declamation—Reading.

MATHEMATICS.—Wentworth's Trigonometry and Surveying ; Analytical Geometry.

SCIENCE.—Chemistry.

RHETORIC.

LATIN.—*First Term.*—Cicero's Orations—Quintilian—Horace's Satires and Epistles—Du Cygne's *Ars Rhetorica*—Lectures on Rhetoric—Compositions in Prose and Verse.

Second Term.—Cicero's Orations—Tacitus' *Agricola* and *Germania*—Juvenal—Sight Reading.

GREEK.—Orations, Demosthenes—Sophocles.

ENGLISH.—Coppens' *Orat. Composition*—Lectures—Analysis—Essays—Declamation—Reading.

MATHEMATICS.—Differential and Integral Calculus.

SCIENCE.—Chemistry, Qualitative Analysis—Laboratory Practice.

PHILOSOPHY.

LOGICS AND METAPHYSICS.—Liberatore.

ETHICS.—Jouin—Public and Private Disputations.

NATURAL SCIENCE.—Physics, Ganot, cf. Dechanelle—S. Thompson's *Electricity and Magnetism*—Mechanics, cf. Dana—Astronomy, Newcomb, Holden—Geology, Le Conte—Lectures by the Students—Essays—Laboratory Practice.

EVIDENCES OF RELIGION.—Schouppé's abridged Course—Lectures and Essays.

GRAMMAR DEPARTMENT.

RUDIMENTS—SECOND CLASS.

LATIN.—Yenni's Grammar.

ENGLISH.—Brown's Grammar—Bible History—Catechism—
Geography — Spelling — Composition — Declamation—
Reading.

ARITHMETIC, Greenleaf.—*Penmanship*.

RUDIMENTS—FIRST CLASS.

LATIN.—Yenni's Grammar—Cicero's Letters.

GREEK.—Yenni's Grammar.

ENGLISH.—Brown's Grammar—History of the United States
—Catechism — Geography — Spelling — Composition —
Declamation—Reading.

ARITHMETIC, Greenleaf.—*Book-Keeping*, Mayhew—*Penman-
ship*.

THIRD GRAMMAR.

LATIN.—Nepos—Phaedrus—Cicero's Letters—Yenni's Grammar and Introduction to Latin Composition.

GREEK.—Yenni's Greek Grammar—Aesop's Fables.

ENGLISH.—Higher Lessons—History of the United States—Geography—De Harbe's Catechism—Composition—Declamation—Reading.

MATHEMATICS.—Loomis' Algebra, begun.

SECOND GRAMMAR.

LATIN.—Cæsar's Commentaries—Ovid's Metamorphoses—Yenni's Grammar and Introduction to Latin Composition.

GREEK.—Yenni's Greek Grammar—Lucian—Xenophon's Anabasis.

ENGLISH.—Higher Lessons—Fredet's Modern History—Ancient Geography and Mythology—De Harbe's Catechism—Composition—Declamation—Reading.

MATHEMATICS.—Loomis' Algebra, completed.

MODERN LANGUAGES.—Elective.

BOARD OF TRUSTEES.

Ed. F. Milholland, Jr.,	W. J. Tyson,	

The Loyola League Lyceum.

THIS Association, composed of former students and others, meets every Tuesday at 8 p. m., in its spacious quarters 106 E. Monument Street, for the intelligent discussion of living and practical questions of the day.

During the year pressing problems of Political Economy and subjects of high literary character occupied the attention of the members. Moreover, a class in Moral Philosophy was formed from the membership and successfully carried on. In addition to the literary features, all the attractions of a first-class Lyceum are offered by this association.

At a meeting held June 7, the following officers were elected to serve until September:

REV. J. A. MORGAN, S. J., *Director.*

J. B. SAUNDERS, M. D., *President.*

JAMES T. KELLY, *Vice-President.*

JOSEPH E. DUNN, *Recording Secretary.*

EDWARD KERR, *Financial Secretary.*

JAMES A. MCINTYRE, *Treasurer.*

Board of Directors.

J. AUSTIN FINK.

OSCAR L. QUINLAN.

JOSEPH I. MAGUIRE.

E. J. RUSSELL.

JOHN J. RODDY.

Loyola Literary Society.

THIS Association offers a field to members of the Senior Classes and ex-students for practice in debate, criticism and elocution. It sends members to compete for the Jenkins medal at the annual public debate, and meets every Wednesday afternoon.

FRANCIS M. CONNELL, S. J., *Moderator.*

First Term.

JOHN F. CONNOR
Charles J. Trinkaus
William C. White
Jeremiah P. Lawlor
John T. McElroy
J. Edwin Murphy
John F. Connor
Francis J. O'Donnell

President
Vice-President
Secretary
Treasurer
Censor
Librarian
Assist. Librarian
Amanuensis

Second Term.

CHARLES J. TRINKAUS
John F. Connor
Martin J. O'Neill
James I. Donellan
Francis J. O'Donnell
J. Edwin Murphy
John T. McElroy
Orville D. Brady

Critics:

Charles J. Trinkaus, Jeremiah P. Lawlor, Charles M. Kelly,
Mark J. Smith, August M. Mark.

The Students' Library.

During the past year the Students' Library has been reorganized, and several hundred volumes added to its catalogue. Special thanks are due to the Librarians and their Assistants for careful and constant attention to the interests of the Library during the year.

Librarians:

CHARLES M. KELLY, JEREMIAH P. LAWLOR,
GARDNER CAUSEY, JAMES L. KEARNEY.

Assistant Librarians:

RICHARD A. O'BRIEN, RAYMOND L. EDWARDS.

FRANCIS M. CONNELL, S. J., *Director.*

The Secchi Scientific Society

OF

LOYOLA COLLEGE.

(ESTABLISHED 1893.)

Its object is: to visit in a body, with the advice or in the company of the Professor, places where the students may observe, in nature or the arts, illustrations of points of Natural Science learned in class; to hold conversations or oral discussions on subjects of Natural Science, and thus profit by mutual communication of thought, and by the imparting of their lights to one another.

Officers.

REV. JOHN J. RYAN, S. J., *President.*WM. P. TONRY, PH. D., *Honorary President.*WM. C. WHITE, '95, *Vice-President.*CHAS. J. TRINKAUS, '93, *Secretary.*JEREMIAH P. LAWLOR, '95, *Treasurer,*

The members are the students of the class of Physics and of that of Chemistry.

St. John Berchmans' Sodality,

SERVING THE SANCTUARY OF ST. IGNATIUS' CHURCH.

THIS Society has for its object the careful and exact carrying out of all the ceremonies of the Church and whatever pertains to the service of the Altar. Membership is limited to the best-behaved boys in the College, and justly considered a great honor.

FRANCIS J. LENAHAH, S. J., *Director.*

ORVILLE D. BRADY, *Prefect and Master of Ceremonies.*

GARDNER CAUSEY, *Secretary.*

JAMES L. KEARNEY, *Treasurer.*

Assistant Masters of Ceremonies.

SPALDING F. HOFFMAN,

JOSEPH F. TIRALLA.

Thurifers.

CARLOS C. WATERS,

JAMES McNALLY,

JOHN T. RODDY,

MARTIN A. O'NEILL.

SCHOLARSHIPS.

Friends of the College and higher education have founded seven Scholarships, known as the Cardinal, the Rhetoric, the Johnson, the Andrews, the Lanahan, the Loyola, and the Maryland Scholarships. The successful competitors for each respectively were :

For the Cardinal.....	R. EMMET LACY,	Class of '95
“ Rhetoric.....	F. HUGHES JOHNSTON,	“ '97
“ Johnson.....	GARDNER CAUSEY,	“ '96
“ Andrews.....	JAMES I. CONWAY,	“ '97
“ Lanahan.....	JOSEPH C. JUDGE,	“ '97
“ Loyola.....	WILLIAM F. McCLINTOCK,	“ '97
“ Maryland.....	THOMAS F. MALEY,	“ '96

This year two Scholarships will be open to competition. Date of examination, August 25. Any holder of a Scholarship who falls below 75 per cent. for two consecutive months, forfeits the honor. Besides these public Scholarships, the Faculty has been empowered to aid boys who may pass a noteworthy examination, even if they failed to secure a Scholarship.
